Cody Solomon - Front-end Developer

SUMMARY

Front-end developer with 6 years of professional experience in development. Experienced in Agile development environments and focused on creating clean, responsive, and functional user interfaces.

SKILLS

- HTML, CSS (SASS/LESS)
- JavaScript (Vue, Angular, Electron, jQuery)
- Wordpress, Drupal, Adobe Experience Manager
- Git/Github
- Adobe Photoshop, Illustrator and XD
- Agile Methodology & Collaboration Software (Jira)

EXPERIENCE

Luckie & Co., Duluth GA — Web Developer / Project Lead

November 2018 - PRESENT

- Developed and managed multiple websites as a project lead, focused on gathering technical requirements with clients, project setup, task management, code review, and deployments
- Learned the Vue.js framework and built out the front-end experience of the *Regions' Road2ATL Sweepstakes* web application for Regions Bank that was a deciding factor in Regions choosing Luckie for their future marketing endeavors
- Built over 10 pharmaceutical websites using Adobe Experience Manager, HTML, CSS (SCSS), and JavaScript (jQuery), and implemented modular development methodologies to increase their build efficiency
- Built an internal Chrome browser extension to increase the security of our website deployments and prevent actions that could cause issues
- Created documentation for the onboarding process to get new developers onboarded within a day
- Used popular project management/collaboration software such as Jira and Git/Github, and Adobe creative software including Photoshop, Illustrator and XD

NovoLogic Inc., Lawrenceville GA — Web Developer

June 2015 - September 2018

- Designed and developed the front-end experience of multiple data-intensive Angular SaaS applications for Delta Airlines, Chick-Fil-A, Papa Johns and other industry leaders that gave them tools to improve and invest in their corporate culture
- Used Adobe Photoshop/Illustrator and other design tools to design websites, applications, and marketing materials for NovoLogic and its clients
- Built websites for clients in the Insurance, Food Service and E-Learning industries using HTML, CSS, JavaScript, WordPress and Drupal
- Learned Agile development methodologies and got certified in the Scrum framework of project development
